

# REVOLUTIONIZE AV AND IT COLLABORATION MANAGEMENT WITH VISIBILITYONE'S TRAILBLAZING SOLUTION

## ABOUT US

VisibilityOne stands out as a leading provider of video conferencing monitoring solutions. Its comprehensive monitoring capabilities, proactive alerting, advanced algorithms, and vendor-agnostic compatibility make it a versatile choice for organizations seeking to optimize their video conferencing environments. With its focus on scalability, integration, and exceptional ROI, VisibilityOne empowers businesses to deliver a reliable and high-performance video conferencing experience, fostering seamless communication and collaboration. Through self-healing of collaboration faults with VisibilityOne's patented technology allows IT teams to assess and resolve issues in real-time, resulting in a 90% faster resolution time per incident and a whopping 35% reduction in caseload.

## THE VISIBILITYONE DIFFERENCE: Live Insights and Actionable Intelligence

Unlike legacy monitoring tools, VisibilityOne delivers actionable live insights to IT management teams. Our unique platform provides:

- Cutting-edge algorithms that detect device faults and automate system responses for lightning-fast fault resolution.
- Comprehensive monitoring and self-healing of critical room components, along with network communication QoS and a diagnostic console.
- An all-inclusive IoT and UC&C monitoring platform for a holistic view of your business.

## VISIBILITYONE'S EXCLUSIVE FEATURES FOR MS TEAMS GIVE ITS USERS A DISTINCT EDGE

**Call Monitoring Outside of the Tenant**  
Unseen with MS Teams Pro view, diagnose, and remediate calls like never before

**Live Network Call Status**  
Get instant information for accurate issue prognosis.

**Network Path Detection**  
Identify weak links with true end-to-end coverage.

**Gateway Network Performance**  
Understand Microsoft's own network response from the crucial gateways terminating the video experience.

**Hybrid Monitoring for Remote Users**  
Gain unique insights into the call, network, and hardware performance of remote hybrid workers.

**IoT Device Integration and Monitoring**  
Get a holistic view of all IP devices in your collaboration rooms' ecosystem.

**Peripheral Health Alerts (under 1 min)**  
Fast diagnostics and notifications for camera, mic, and AV health.
